A creative and motivated Full-Stack Developer offering two years of experience in creating interactive web applications. Enthusiastic about creating web solution to tomorrows productivity problem. I have a strong collaboration skill and proven history of Application Development.

Work History

Software Development Facilitator

LSETF, USADF, Loftyinc Allied Partners Ltd

- Assess individual and group training needs; in Software Development Cohort 5 program, sponsored by United States African Development Foundation (USADF) and Lagos State Employability Trust Fund (LSETF) in Partnership with Loftyinc Allied Partners Limited.
- Plan, Prepare and Research Lessons.
- Develop and deliver programs of learning with focus on web using JavaScript, React, HTML/CSS, Mui, and Firebase as tools.
- Check and assess beneficiaries work and deliver feedback with course grades.
- Apply new technologies to deliver courses and improve the learning experience of beneficiaries (e.g. distance learning).

Web Developer

CodeLab, Apapa, Lagos

- Built a web application known as AJ Report Center, with a team. The platform was developed to help solve the security challenges facing our community and it won us the price in the first ever Ajegunle Hackathon hosted in March 2021. The project was achieved with React for the frontend while Firebase serve as the backend for User Authentication and database.
- Worked as the frontend developer for a rental platform where estate agents can upload available houses for rental/purchase and users can contact them through the platform. The project was developed using React and Firebase.
- Created Web Applications using JavaScript.

Freelance

- Built a web application for an NGO base in Lagos. It has a feature for fund raising, as payment can be made through the platform. I used the MERN stack for development. PayStack was integrated for payments.
- Developed a web platform for a private university in Porto Novo which has student portal and an admin page. Students can view results on their personal dashboard. Developed with React and Firebase.
